Training Descriptions

Child Development, Health, and Safety Basics – This training will provide participants an overview of child development, health, and safety issues for children birth through early school-age. Emphasis will be on understanding patterns of development, developmental domains, and the role of nutrition in development. In addition, health and safety issues will address supporting the growth of healthy children - from the basics such as handwashing to more in-depth practices surrounding healthy procedures and disease prevention. Participants will learn more about emergency planning/preparedness and first aid as well as identify tips for maintaining safe indoor/outdoor environments.

CPR & First Aid Certification – This course is certified through the American Heart Association. It is a video-based, instructor-led course that teaches students critical skills needed to respond to and manage an emergency until emergency medical services arrive. Skills covered in this course include first aid; choking relief in adults, children and infants; and what to do for sudden cardiac arrest in adults, children, and infants.

ECE Credential Level 1 – Module 1: Child Development Overview – Participants receive an overview in child development for children birth through early school-age. Emphasis will be on understanding basic milestones in development as well as on strategies used to promote the health.

ECE Credential Level 1 – Module 2a: Health Issues for Group Care – Ensuring a child's health and well-being requires more than basic first aid and emergency contacts. In this class, you will learn how to help the growth of healthy children-from the basics like hand washing to a more in-depth look at various practices surrounding healthcare.

ECE Credential Level 1 – Module 2b: Nutrition Issues for Group Care – Whether you are responsible for providing a quick snack or a well-balanced meal, understanding children's dietary needs creates healthier and happier kids. Learn the basics of good nutrition, food safety, and various practices surrounding nutrition through this class that offers hands-on activities and practical discussions that will make science and good nutrition easy to understand.

ECE Credential Level 1 – Module 2c: Safety Issues for Group Care – A child's safety is the number one concern for parents and child care providers alike. In this class, you will identify tips for creating a safer group care environment, confront the issue of abuse and neglect, and learn more about emergency preparedness and first aid.

IDCFS Mandated Reporter Training – The purpose of this online course is to help all Illinois Mandated Reporters understand their critical role in protecting children by recognizing and reporting child abuse. Everyone who suspects child abuse or neglect should call the Illinois Department of Children and Family Services Child Abuse Hotline to make a report, but Mandated Reporters are required by law to do so.

Online Health & Safety Trainings – The purpose of these scheduled computer hours is for providers to come to the YWCA and use the computer lab to complete the required health and safety trainings online through Gateways iLearning website as well as the IDCFS Mandated Reporter Training website. These computer hours are staff assisted, meaning YWCA Staff Members will be present to assist in helping you to complete the trainings when needed. Certificates will be printed upon completion of each training.

What is CCAP? – Join this informative session to become more familiar with the procedures, including the application process, provider qualifications, the payment process, and parent co-payments. The Child Care Assistance Program funded by the Illinois Department of Human Services.
