*** The final portion of this update involves a **Market Rate Survey**. This is a survey that is conducted to survey the "price" of child care in the local market. To do this, we need to collect information regarding a provider's rates and current enrollment. The market rate survey is used to determine equitable payment rates for subsidized child care. Provider participation is **vitally** important to the child care provider community. Setting fair subsidy payment rates depends on obtaining current rates from a large percentage of both center and family home providers from all regions of Illinois. Individual rate information we collect is **not** shared with parents.*

Rates and Current Enrollment

Please complete the chart below by listing your rate information by age group. The survey is looking for your full-time rate information on your day shift only. If you are a family daycare home you will also need to list your current enrollment information for your day shift by age group. Please list only children that are attending during the day shift and over 35 hours per week.
